

JCM 111 Full-Repair Clamps

JCM 111 Full-Repair clamps are a fast economical means of permanently repairing steel pipe with extensive corrosion, splits, punctures or pin holes. These clamps have a heavy, full circumferential Buna-N gasket with a hardened recessed armor. This provides extra sealing capability for heavily damaged pipe and pipe with reduced diameter due to corrosion.

JCM 111 FULL-REPAIR CLAMPS Steel Pipe Sizes - IPS

Material Specifications For JCM 110 PATCH CLAMPS and JCM 111 FULL-REPAIR CLAMPS

JCM 110 PATCH CLAMP

Lug: Ductile Iron ASTM A-536
Gasket: Rubber gasket suitable for gas.
Band: Stainless Steel 18-8 Type 304
Hardware: Electro-galvanized Steel. Stainless Steel available.

JCM 111 FULL-REPAIR CLAMP

Lug: Ductile Iron ASTM A-536
Gasket: Buna-N
Band: Stainless Steel 18-8 Type 304
Hardware: Electro-galvanized Steel. Stainless Steel available.

An additional 5% charge will be applied to 111 Full-Repair Clamp orders for quantities less than carton quantities listed.
