

# JCM 905 Torque Wrench

## JCM 910 Extra Deep Socket Set

Designed For Field Use

**Knurled Grip** provides a rugged No-Slip Grip that allows continual pull on the wrench during tighten process. Manual wrench allows for more accurate levels or torque to be achieved.

**1/2" Standard Drive\*** accepts any 1/2" standard square socket.

**Audible Torque Indicator** provides "click" sound that provides immediate confirmation the proper torque level has been met. Audible click eliminates the necessity of watching or protecting fragile dials and pointers.

**Reverse Action Lever** make use simple, the same motion both tightens and loosens with just a flip of the lever.

**No Handles to Align.** One strong hand eases use, especially in harsh environments and inclement weather.

The JCM 905 meets the Federal Specification GGG-W-00686C and is delivered calibrated with an accuracy of  $\pm 4\%$ .

### JCM 910 Extra Deep Socket Set

Available from JCM this four piece deep socket set includes the popular 1/2" drive sockets sizes 15/16", 1-1/16", 1-1/8", 1-1/4" with a plastic storage case to protect and store sockets when not in use.

The JCM 905 and 910 come with their own storage cases to protect them when not in use.

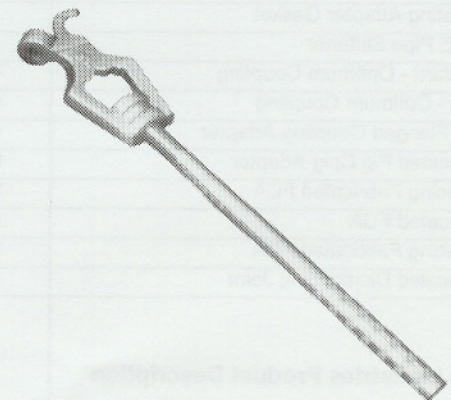

Adjusts from 10 - 150 Ft. Lbs. - accommodates most common pipe fitting installation torque level recommendations.
